**ELEVENTH TEXAS SYMPOSIUM ON
RELATIVISTIC ASTROPHYSICS^a**

Editor and Local Organizing Committee Chairman

DAVID S. EVANS

Executive Committee

Y. NE'EMAN, I. ROBINSON, *Chairman*, E. SCHÜCKING, M. SHAPIRO,
H. J. SMITH, J. A. WHEELER, and J. C. WHEELER

Scientific Organizing Committee

J. BAHCALL, J. BARDEEN, R. BLANDFORD, B. DEWITT, S. HOLT, F. JONES,
R. MATZNER, C. MCKEE, W. PRESS, R. RAMATY, I. ROBINSON,
M. RUDERMAN, P. SHAPIRO, L. SHEPLEY, G. SHIELDS, H. SMITH,
M. H. ULRICH, S. WEINBERG, J. A. WHEELER, and J. C. WHEELER, *Chairman*

CONTENTS

Preface. By DAVID S. EVANS and J. CRAIG WHEELER xi

Part I. Particle Physics and Astrophysics

John A. Wheeler, *Chair*

The New Inflationary Universe. By ALAN H. GUTH 1

Microcosmology: New Particles and Cosmology. By HEINZ R. PAGELS 15

Massive Magnetic Monopoles in Cosmology and Astrophysics. By EDWARD W.
KOLB 33

Part II. General Relativity

Bryce DeWitt, *Chair*

Energy in Gravitational Theories: Definition, Positivity Theorems, and
Stability. By S. DESER 45

General Relativistic Collapse of Rotating Stars. By TAKASHI NAKAMURA 56

^aThis volume is the result of a conference entitled Eleventh Texas Symposium on Relativistic Astrophysics held from December 12 to December 17, 1982 in Austin, Texas, sponsored by the American Institute of Physics, the American Astronomical Society, the Astronomical Society of the Pacific, the Committee on General Relativity, and The New York Academy of Sciences.

Part III. Large-Scale Structure

Jaán Einasto, Chair

Adiabatic Theories of Galaxy Formation and Pancakes. <i>By</i> J. RICHARD BOND and ALEXANDER S. SZALAY	82
Pancakes and the Formation of Galaxies: Neutrinos and Other 'Inos. <i>By</i> PAUL R. SHAPIRO and CURTIS STRUCK-MARCELL	90
The Texture of the Universe. <i>By</i> ROBERT P. KIRSHNER, AUGUSTUS OEMLER, JR., PAUL L. SCHECHTER, and STEPHEN A. SHECTMAN.....	91
The Development of Galaxy Clusters. <i>By</i> E. E. SALPETER	95

Part IV. Big Bang Cosmology

Richard Matzner, Chair

Big Bang Nucleosynthesis: Gateway to the Very Early Universe. <i>By</i> MICHAEL S. TURNER	106
Nature and Significance of the Mass Distribution in the Universe. <i>By</i> P. J. E. PEEBLES.....	118

Part V. New-Generation Telescopes

Aden Meinel, Chair

The 300-Inch New Texas Telescope. <i>By</i> HARLAN J. SMITH	126
The University of California Ten-Meter Telescope Project. <i>By</i> JERRY NELSON..	140
Steps Toward Eight-Meter Honeycomb Mirror Blanks. I. Rationale and Approach. <i>By</i> J. R. P. ANGEL and NEVILLE J. WOOLF	163
Large Optical Telescopes: New Views into Space and Time. <i>By</i> S. M. FABER	171

Part VI. Pulsars

Peter Sutherland, Chair

The 1.5-Millisecond Pulsar. <i>By</i> D. C. BACKER.....	180
The Millisecond Pulsar. <i>By</i> ANDREW F. CHENG	182

Part VII. Supernovae

James Wilson, Chair

Models of Type I Supernovae and Observations of SN 1981b. <i>By</i> DAVID BRANCH	186
Core-Collapse Models of Type II Supernova Explosions and Neutron Star Formation. <i>By</i> WOLFGANG HILLEBRANDT	197
The Interaction of Supernovae with a Circumstellar Medium. <i>By</i> ROGER A. CHEVALIER.....	215
Interaction of Supernova Ejecta with Interstellar and Circumstellar Matter. <i>By</i> E. P. LIANG and R. A. CHEVALIER.....	233

Part VIII. High-Energy Astrophysics

Maurice Shapiro, Chair

Physics of Gamma-Ray Bursts. <i>By</i> D. Q. LAMB	237
History of X-Ray Transients as Seen by Vela, 1969-1979. <i>By</i> J. TERRELL, W. C. PRIEDHORSKY, R. D. BELIAN, J. P. CONNER, and W. D. EVANS.....	282

Part IX. Active Galaxies

Leon Mestel, *Chair*

The Emission-Line Regions of Quasars. <i>By</i> JOHN KWAN	284
Line Variability in Active Nuclei and the Structure of the Broad-Line Region. <i>By</i> M. H. ULRICH	291
Models of Active Galactic Nuclei. <i>By</i> R. D. BLANDFORD	303
Supernovae, Neutrino Rest Mass, and the Middle-Energy Neutrino Background in the Universe. <i>By</i> GENNADYI S. BISNOVATYI-KOGAN and ZAKIR F. SEIDOV	319

Poster Papers

On the Magnetization and Origin of the Millisecond Pulsar PSR 1937 + 214. <i>By</i> JONATHAN ARONS	328
Pulsar Magnetospheres. <i>By</i> E. ASSÉO, D. BEAUFILS, and R. PELLAT	329
Relativistic Stars with Anisotropic Pressure. <i>By</i> SELÇUK Ş. BAYIN	330
Trace Anomaly in the "Massive" Gowdy T^3 Cosmology. <i>By</i> BEVERLY K. BERGER	331
Cosmology in General Relativity with Higher Derivatives. <i>By</i> KENNETH BRECHER	332
Neutrino Transport and Shock Propagation in the Core Collapse of a Massive Star. <i>By</i> STEPHEN W. BRUENN	333
The Radio Structure of the X-Ray Jet in Centaurus A. <i>By</i> J. O. BURNS, E. D. FEIGELSON, and E. J. SCHREIER	334
Manifestations of a Cosmological Density of Compact Objects in Quasar Light. <i>By</i> CLAUDE R. CANIZARES	335
Dwarf Nova Instabilities. <i>By</i> J. K. CANNIZZO and J. C. WHEELER	337
FRW Models as Exact Viscous Magnetohydrodynamical Cosmologies. <i>By</i> A. A. COLEY and B. O. J. TUPPER	338
A Single Expression for the General Solution of Einstein's Vacuum and Electrovac Field Equations with Cosmological Constant for Petrov Type D Admitting a Nonsingular Aligned Maxwell Field. <i>By</i> R. DEBEVER, N. KAMRAM, and R. G. MCLENAGHAN	339
Killing Tensors and the Geodesic Deviation Equation. <i>By</i> P. DOLAN and J. L. SAFKO	340
Gravitational Lenses Producing a Large Number of Images. <i>By</i> CHARLES C. DYER	341
Implications of an Alternative Relativistic Transport Theory. <i>By</i> JOHN J. DYKLA and ANTHONY E. HWANG	342
Loss of Angular Momentum in Binary System Due to Collisionless Particles as Monopoles, Gravitinos, or Mirror Particles: Does It Exceed the Gravitational Radiation Emission in Binary System PSR 1913 + 16? <i>By</i> DANIELE FARGION	343
A Camera for Very High Energy Gamma-Ray Astronomy. <i>By</i> D. J. FEGAN, D. MCLAUGHLIN, J. CLEAR, M. F. CAWLEY, N. A. PORTER, K. GIBBS, T. C. WEEKES, R. C. LAMB, P. GORHAM, and V. J. STENGER	345

Program and Results of the Homestake Muon, Neutrino, and Proton Decay Experiment. <i>By</i> ERVIN J. FENYVES	347
Quasars as Supermassive Binaries. <i>By</i> C. MARTIN GASKELL	349
Broad-Line Clouds in Active Galactic Nuclei: Physical Conditions and Motions. <i>By</i> C. MARTIN GASKELL	350
Curvature Coordinates in Cosmology. <i>By</i> RONALD GAUTREAU	351
Variability of SS433 and Extragalactic Compact Radio Sources. <i>By</i> B. J. GELDZAHLER, J. H. SPENCER, K. J. JOHNSTON, E. B. WALTMAN, W. J. KLEPCZYNSKI, P. E. ANGERHOFER, D. R. FLORKOWSKI, D. D. MCCARTHY, and D. N. MATSAKIS	352
The Gravitationally Bound Current Loop Model for Quasars and Galactic Nuclei. <i>By</i> HOWARD D. GREYBER	353
Possibility of Detecting the Magnetic Field of a Rotating Neutron Star with SQUID. <i>By</i> J. GRYGAR, M. ODEHNAL, V. PETŘÍČEK, and K. PRIKNER	355
High-Energy Gamma Rays from Pulsars. <i>By</i> S. K. GUPTA, P. V. RAMANA MURTHY, B. V. SREEKANTAN, S. C. TONWAR, and P. R. VISWANATH	356
The Evolution of Voids in the Expanding Universe. <i>By</i> MARK A. HAUSMAN, DONALD W. OLSON, and BERNARD D. ROTH	357
Active Galaxies and the Diffuse Gamma-Ray Background. <i>By</i> D. KAZANAS and R. J. PROTHEROE	358
Astrophysical Boosters. <i>By</i> W. KUNDT	359
A Solar Breeder to Explain Constant Luminosity and Lack of Neutrinos. <i>By</i> L. H. LEVINE and L. M. LIBBY	365
Three-Millimeter Anisotropy Measurement. <i>By</i> PHILIP M. LUBIN, GERALD L. EPSTEIN, and GEORGE F. SMOOT	366
X-Ray Spectral Variability of BL Lac Objects. <i>By</i> DARIO MACCAGNI, TOMMASO MACCAGARO, and MASSIMO TARENGHI	367
An Accretion Disk Origin for the Ultraviolet Excess of Luminous Quasars: The Confrontation of Theory with Observation. <i>By</i> MATTHEW A. MALKAN	368
The Unobservability of Higher-Order Moments in the Cosmic Background Radiation. <i>By</i> DENNIS W. MARKS	369
A Complete Sample of Quasars at $B = 19.80$. <i>By</i> H. L. MARSHALL, Y. AVNI, A. BRACCESI, J. P. HUCHRA, H. TANANBAUM, G. ZAMORANI, and V. ZITELLI	370
Radiation from Test Charges in Yang-Mills Theories. <i>By</i> THOMAS A. MORGAN	371
Nonlinear Density Fluctuations in a Two-Component Fluid during the Recombination Era of the Universe. <i>By</i> EKKEHARD NOWOTNY	372
Black Hole Nuclear Cluster Model of Quasars and Active Galactic Nuclei. <i>By</i> A. G. PACHOLCZYK and W. R. STOEGE	373
A Gravitation Theory with G Determined by Retarded Cosmic Potential. <i>By</i> KARL PHILBERTH	375
Dynamics of Accretion Disks around Compact Objects. <i>By</i> A. R. PRASANNA and D. K. CHAKRABORTY	377
Spinning Fluid Energy-Momentum Tensors in the Einstein-Cartan Theory. <i>By</i> JOHN R. RAY and LARRY L. SMALLEY	378

United Kingdom Schmidt Telescope Objective Prism Surveys for QSOs. <i>By</i> ANN SAVAGE.....	380
X-Ray Constraints on Relativistic Beams in BL Lacertae Objects. <i>By</i> D. A. SCHWARTZ and G. M. MADEJSKI	381
Results from the Durham-AAT Red Shift Survey. <i>By</i> T. SHANKS	382
Spectrum of the Cosmic Background Radiation. <i>By</i> G. SIRONI, N. MANDOLESI, G. DE AMICI, S. FRIEDMAN, G. SMOOT, C. WITEBSKY, R. B. PARTRIDGE, and L. DANESE.....	383
Gamma-Ray and X-Ray Telescope Using Variable-Metric Diffraction Crystals. <i>By</i> ROBERT K. SMITHER.....	384
A Closed Pulsating Universe with Inner Dimensionality. <i>By</i> F. R. TANGHERLINI.....	385
Does Gravity Exhibit a $1/r$ Force on the Scale of Galaxies? <i>By</i> JOEL E. TOHLIN.....	390
Optically Thick, Time-Dependent Accretion onto Black Holes. <i>By</i> PETER VITELLO	391
Just How Fast Are Tachyons? <i>By</i> T. A. WEBER	392
Improved Collimation for Radio Sources. <i>By</i> PAUL J. WITA and M. JAVAD SIAH	393
Index of Contributors.....	395

Financial assistance was received from:

- NATIONAL AERONAUTICS AND SPACE ADMINISTRATION
- NATIONAL SCIENCE FOUNDATION
- MRS. WINNIE SCHILD
- DR. HARLAN SMITH
- TRACOR INDUSTRIES
- UNITED STATES DEPARTMENT OF ENERGY
- UNIVERSITY OF TEXAS AT AUSTIN
- DR. STEVEN WEINBERG
- DR. JOHN A. WHEELER

The New York Academy of Sciences believes that it has a responsibility to provide an open forum for discussion of scientific questions. The positions taken by the participants in the reported conferences are their own and not necessarily those of The Academy. The Academy has no intent to influence legislation by providing such forums.
